(DOMINION BUREAU OF STATISTICS)

External Trade Division

CHANGES AFFECTING PREVIOUS REPORTS
Cumulative Totals adjusted in the September Report

DOMESTIC EXPORTS

1964
Export
List No. 8

January, 1964

Class

900-23 - Deduct from Kenya	-	\$	251
900-23 - Add to Tanganyika	-	\$	251

June, 1964

Class

510-99 - Deduct from Chile	-	\$	71,750
529-59 - Add to Chile	-	\$	70,993

August, 1964

Class

236-38 - Deduct from United States	1,600 cord	\$	12,000
236-99 - Add to United States	1,600 ton	\$	12,000

NOTE: Effective with the September issue of this report, trade with Zanzibar and Pemba which was formerly included with Kenya is now recorded with Tanganyika. Export statistics are adjusted retroactive to January 1, 1963

SUMMARY TABLES:

Table 1. Domestic Exports by Countries	4
Table 2. Re-Exports by Countries	7
Table 3. Domestic Exports by Sections to Principal Countries	10

DETAILED TABLES:

Table 4. Domestic Exports by Commodities and Countries:

Section	Classes	
Live animals	1-19 to 9-99	11
Food, feed, beverages and tobacco	11-09 to 183-99	13
Crude materials, inedible	201-10 to 291-99	52
Fabricated materials, inedible	300-12 to 490-99	68
End products, inedible.....	500-19 to 960-99	127
Special transactions — trade	970-10 to 970-75	216

Table 5. Re-Exports by Groups and Countries.....	219
Table 6. Special Transactions — Non-trade	245
Table 7. Value, Price and Volume Indexes of Domestic Exports by Sections	252

EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at D.B.S. during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. Most export entries reach D.B.S. within a week of the date the goods leave Canada, although entries for some waterborne shipments arrive much later. Electricity exports are usually included in statistics for the month in which these exports actually occurred. Pipeline exports of crude petroleum are reported too late for inclusion in statistics for the month when these exports actually occurred; they are therefore included in statistics for the following month.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
 - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

Although the definition of re-exports is the same as was used in 1963 and earlier years, commencing in January 1964 statistics of re-exports include exports from customs warehouses, which were previously excluded from this record. This parallels a change in import statistics, which from January 1964 include goods entered into customs warehouses rather than goods cleared from customs warehouses.
 - c. **Exclusions:** The following commodity movements are excluded from export statistics (some of these are recorded separately as Special Transactions —Non-trade in Table 6 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 256-99); settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our N.A.T.O. allies or by foreign diplomats); temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's N.A.T.O. allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use comparable measures of quantity.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars. This has resulted in some overstatement of the value of exports for the period prior to June 1961, and some understatement of their value in subsequent months.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

TABLE 7. VALUE, PRICE AND VOLUME INDEXES OF DOMESTIC EXPORTS,
BY SECTIONS (INTERIM BASE, 1948 = 100)

	Month	Total			Live animals			Food, feed, beverages and tobacco

EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at D.B.S. during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. Most export entries reach D.B.S. within a week of the date the goods leave Canada, although entries for some waterborne shipments arrive much later. Electricity exports are usually included in statistics for the month in which these exports actually occurred. Pipeline exports of crude petroleum are reported too late for inclusion in statistics for the month when these exports actually occurred; they are therefore included in statistics for the following month.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
 - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

Although the definition of re-exports is the same as was used in 1963 and earlier years, commencing in January 1964 statistics of re-exports include exports from customs warehouses, which were previously excluded from this record. This parallels a change in import statistics, which from January 1964 include goods entered into customs warehouses rather than goods cleared from customs warehouses.
 - c. **Exclusions:** The following commodity movements are excluded from export statistics (some of these are recorded separately as Special Transactions —Non-trade in Table 6 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 256-99); settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our N.A.T.O. allies or by foreign diplomats); temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's N.A.T.O. allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use comparable measures of quantity.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars. This has resulted in some overstatement of the value of exports for the period prior to June 1961, and some understatement of their value in subsequent months.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

TABLE 7. VALUE, PRICE AND VOLUME INDEXES OF DOMESTIC EXPORTS,
BY SECTIONS (INTERIM BASE, 1948=100)

	Month	Total			Live animals			Food, feed, beverages and tobacco		
		1962	1963	1964	1962	1963	1964	1962	1963	1964
		Index of declared values								
		192.3	209.0	243.8	45.0	89.7	30.9	116.2	148.4	208.6
1	January	161.1	167.3	210.8	35.9	46.8	23.1	110.2	107.5	163.9

EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at D.B.S. during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. Most export entries reach D.B.S. within a week of the date the goods leave Canada, although entries for some waterborne shipments arrive much later. Electricity exports are usually included in statistics for the month in which these exports actually occurred. Pipeline exports of crude petroleum are reported too late for inclusion in statistics for the month when these exports actually occurred; they are therefore included in statistics for the following month.

3. Coverage:

- a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
- b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

Although the definition of re-exports is the same as was used in 1963 and earlier years, commencing in January 1964 statistics of re-exports include exports from customs warehouses, which were previously excluded from this record. This parallels a change in import statistics, which from January 1964 include goods entered into customs warehouses rather than goods cleared from customs warehouses.

- c. **Exclusions:** The following commodity movements are excluded from export statistics (some of these are recorded separately as Special Transactions —Non-trade in Table 6 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 256-99); settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our N.A.T.O. allies or by foreign diplomats); temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's N.A.T.O. allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

5. **Quantities:** Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use comparable measures of quantity.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.

6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars. This has resulted in some overstatement of the value of exports for the period prior to June 1961, and some understatement of their value in subsequent months.

7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at D.B.S. during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. Most export entries reach D.B.S. within a week of the date the goods leave Canada, although entries for some waterborne shipments arrive much later. Electricity exports are usually included in statistics for the month in which these exports actually occurred. Pipeline exports of crude petroleum are reported too late for inclusion in statistics for the month when these exports actually occurred; they are therefore included in statistics for the following month.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
 - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

Although the definition of re-exports is the same as was used in 1963 and earlier years, commencing in January 1964 statistics of re-exports include exports from customs warehouses, which were previously excluded from this record. This parallels a change in import statistics, which from January 1964 include goods entered into customs warehouses rather than goods cleared from customs warehouses.
 - c. **Exclusions:** The following commodity movements are excluded from export statistics (some of these are recorded separately as Special Transactions —Non-trade in Table 6 of this report): gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 256-99); settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our N.A.T.O. allies or by foreign diplomats); temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's N.A.T.O. allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use comparable measures of quantity.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars. This has resulted in some overstatement of the value of exports for the period prior to June 1961, and some understatement of their value in subsequent months.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report. Amendments effective in any year are listed in the January report for that year.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

TABLE 7. VALUE, PRICE AND VOLUME INDEXES OF DOMESTIC EXPORTS,
BY SECTIONS (INTERIM BASE, 1948=100)

	Month	Total			Live animals			Food, feed, beverages and tobacco
